

SERVICE THROUGH INNOVATION

## ICE SCRUB 35

SERVICE THROUGH INNOVATION

The ICE Scrub 35 is the only small-sized scrubbing machine, which can clean in corners and along walls with extreme ease.

This battery powered machine is cable free for best manoeuvrability in small and congested areas.

It comes with a built-in battery charger and gel batteries as standard.

The ICE Scrub 35 is ideal for small congested areas and is a great alternative to manual cleaning systems such as the mop and bucket.

The ICE Scrub 35 can scrub under areas up to 35cm from the floor and is available in both a disc and cylindrical option.

The cylindrical option is best suited for profiled floor surfaces where as the disc machine is more suited to smooth polished floors. Both machines can scrub under objects up to 35cm from the floor.
