

ICE Pulse 390B

Introducing the Pulse 390, a revolutionary machine that redefines deep cleaning and treatment of all floor types. Equipped with an onboard lithium battery, this innovative device offers unparalleled portability and convenience.

The Pulse 390 is built to withstand the toughest cleaning challenges. Its super elastic wheels ensure smooth manoeuvrability across various surfaces.

With an IP55 protection class for the motor and electrical components, this machine prioritizes safety and durability, providing long-lasting performance even in demanding environments.

The Pulse 390 features Micropulse Technology, an exclusive system derived from an Italian engineering concept. By generating powerful turbulence, this technology effectively eliminates any type of dirt from the floor, all while ensuring a vibration-free and effortless cleaning experience for the user.

Specification	ICE Pulse 390B
Motor Power	300 kw
Voltage	36 V
Rotation	2,800 rpm
Motor Height	25 cm
Work Surface	39 x 23 cm
Weight	30 Kg
Noise Level	64 dBA
Tank Capacity	8 l
Cable Length	15 m
Handle height	110 cm
Folded Handle Height	110 cm
Run Time	2 Hr
