

# ICE Pulse 400SD

Introducing the Pulse 400SD, a game-changing machine with a exclusive rectangular plate featuring micro-impulse movement. This cutting-edge device boasts two brush motor power levels, the Eco-Max and Eco-Mode, allowing for customisable cleaning performance to meet diverse needs.

The Pulse 400SD offers a user-friendly experience with its simple water flow rate adjustment via the tap. Additionally, the machine facilitates solution drain through its convenient display, ensuring efficient maintenance.

With the level sensor dirty water stop-total feature integrated into the recovery tank, the Pulse 400SD guarantees optimal cleanliness. The optical solution level indicator provides real-time monitoring, allowing users to stay informed and plan their cleaning routines effectively. The machine features an instant water shut-off button, adding an extra layer of control and safety.

Say goodbye to dirt, dust, and allergens as this machine comes equipped with a standard air filter, ensuring the longevity and protection of the turbine.

Featuring a standard H13 HEPA filter on the turbine exhaust, it effectively captures and traps microscopic particles, leaving the air around you fresh and pure.

Specification	ICE Pulse 400
Voltage	54.6 V
Motor Height	1,100 mm
Noise Level	66.7 dBA
Tank Capacity	12 l
Recovery Tank Capacity	14 l
Working Width	39 x 23 cm
Brush Speed	2,800 rpm
Run Time	1 Hr
Charge Time	2 Hr
