

ICE Urban 1350

The ICE Urban 1350 electric sweeper has been designed for cleaning city centres, pavements, pedestrian areas and parks. It is so compact and easy to handle that it can be driven with one hand and does not require a license to operate.

With ICE Urban 1350, you can move easily between benches and trees and, thanks to the chariot, you can comfortably drive it for long stretches from one area of the city to another.

Thanks to the mechanical action of the central brush, waste is collected inside the 135 L bin, while the powerful filtering system absorbs and retains PM10 fine dust, sending clean air into the environment. The suction hose allows you to remove dirt from tight corners and spaces that cannot be reached by brushes, such as between bicycle racks or in flower beds.

Specification	Detail
Hopper capacity	135 ltr
Sweeping width	125 cm
Run time	8 hrs
Max speed	6.5 km/hr
Water tank	30 ltr
Battery	320 (274) Ah/5
Max gradient	20%
