

# ICE Urban 240 Follow Me Max

We have always wondered how we can make the cleaning of public spaces more efficient and user friendly. The use of equipment to do these tasks should increase productivity while reducing strain on the operator. This is why we developed Follow Me, the innovative autonomous driving system for the ICE Urban 240 unit. When turned on the Follow Me system is able to identify and track the operator, allowing the machine to follow them in total safety and even in crowded areas. The first and only self-driving street vacuum cleaner in the world.

The full set of sensors on the machine allows it to detect and avoid fixed and mobile obstacles, guaranteeing the safety of the machine and those around it. The 30 litre on-board liquid tank is capable of holding any type of cleaning or sanitizing product. The suction pipe nozzle allows you to put out lit cigarette butts or sanitize a surface after vacuuming animal waste, while the second nozzle helps to avoid combustion inside the bin, reduces dust and deodorizes.

The ICE Urban 240 Follow Me Max guarantees high operator comfort and ease of operation, freeing you from manually positioning the machine.

With zero emissions and low noise level you can work in crowded centres and pedestrian areas with minimal disruption.

Specification	Detail
Hopper capacity	240 ltr
Dimensions	183.5 x 97.5 x 182.5 cm
Run time	10 hrs
Max speed	6 km/hr
Noise level	68 dBA
Battery	320 (274) Ah/5
Max gradient	20%
