

ICE Wash H 10

The ICE Wash H 10 is a professional hot pressure washer equipped with a single-phase electric motor capable of guaranteeing excellent performance in more difficult environments. Equipped with a solid, robust structure, this high-pressure washer was designed for professional use. However, the ICE Wash H 10 is also very compact and easy to handle, thanks to the two back wheels with rubber treads and the pivoting front wheel.

One of the ICE Wash H 10's key features is the painted steel vertical hot box equipped with a spiral cooling system for the heater, which is switched on by a separate electric motor.

Thanks to the combination of power, pressure and flow rate, this professional hot pressure washer is perfect for deep cleaning environments in the automotive, handicraft, industrial, building and agricultural sectors.

Specification	ICE Wash H 10
Max pressure	150/2200 bar/psi
Max flow rate	600 l/h
Power Consumption	3 KW
Power supply	230/50 V/Hz
Rotation speed	1,450 rpm
Weight (empty)	82 kg
Dimensions (L x W x H)	100 x 57 x 82 cm
