

Maintenance & Pre-Call Checklist

Please follow the steps below before contacting ICE

SCRUBBER DRYERS

- Please ensure tanks are emptied and cleaned after every use.
- Please ensure drive boards or brushes are removed after every use, cleaned, and hung up to dry.
- Please remove the squeegee bar, clean the blade and place into the recovery tank after every use.
- Once on charge, this must have a full charge before disconnecting. This will prevent an optune charge and extend the life of the batteries.
- Clean and remove any debris from both the clean & dirty filters.
- Ensure that the water release button or lever is switched off when the machine is stationary.
- Clean through pipes to prevent blockages.
- Please ensure that you check all charging and fixed leads for breaks, exposed wiring and burning before use.

STEAM CLEANERS

- Do not fill the tank with hot water, cold water only.
- Do not apply chemical, unless advised to on the machine.
- Do not apply steam directly onto the body.
- Ensure machine is turned off and plug removed from the wall.
- Please wait until temperature is at operating ranges before use.
- Please ensure that you check all charging and fixed leads for breaks, exposed wiring and burning before use.

SWEEPERS

- Please ensure that the hopper is emptied after every use.
- Clean and maintain the sweeper brushes weekly.
- Avoid long wrapping, as this gets wrapped around the brush and will damage the machine.
- Please ensure that you check all charging and fixed leads for breaks, exposed wiring and burning before use.
- Please use filter shaker after each use where applicable.

VACUUM CLEANERS

- Please ensure that you clean the filters after each use.
- Empty or remove debris bag once full.
- Check wiring for any damage at the end of each use.
- Please sure that you do not overextend the cable.
- Ensure that the hose is clean and clear in order to prevent blockages.
- Please ensure that you check all charging and fixed leads for breaks, exposed wiring and burning before use.
