

ICE R SWEEP 80

The ICE R Sweep 80 is a sweeping machine that is suitable for cleaning the most resistant dirt on both indoor and outdoor surfaces. It is ideal for spaces of up to 20,000 square metres, as well as small, narrow or cluttered areas, thanks to the box frame built around the centre brush which is very compact, yet extremely robust.

To guarantee maximum driving comfort for the operator, and maximum reliability, all the main functions are hydraulic.

Specification

Detail

Battery motor

36 V

Hopper capacity

190 Ltr

Working width

112 cm

Noise level

74 dBA

Run time

3 hrs

Weight

700 Kg

Productivity

9,510 m²/h

Dimensions (L x W x H)

202x143x113 cm
