

SHADOW

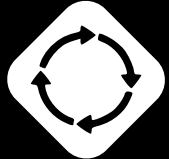

Shadow (PUDU CC1) is a 4-in-1 cleaning robot that sweeps, scrubs, vacuums, and dust-mops. It is suitable for a range of hard and soft floor types including terrazzo, marble, tile, epoxy resin, sandstone, and carpet.

Shadow allows efficient edge to edge and corner cleaning thanks to its side brush - 0cm from the edge!

Its extension handle makes it convenient to build cleaning maps and handle unexpected cleaning emergencies.

If the power is low but the cleaning task hasn't been completed, Shadow remembers the cleaning progress and resumes the previously unfinished task after being fully charged.

Optional vacuum accessories are available for purchase with your Shadow.

VERSATILE CLEANING

Four-in-one cleaning (scrubs, sweeps, vacuums, and dust mops). Small enough to clean under tables.

DYNAMIC MAPPING

Perfect for dynamic environments, offering real-time route planning and smart adjustments based on current conditions. The robot automatically updates its map when obstacles change. And maps can be changed and update remotely.

AUTO POWER CHARGING & WATER REFILL WITH DOCKING STATION

No need for manual intervention, providing a fully autonomous solution that reduces workload, enhances efficiency, and ensures seamless operation without constant supervision.

MOBILE WATER TANK

No plumbing modifications required. Smart monitoring system with real-time water change alerts, convenient and user-friendly trolley-style design for easy mobility.

Specification	Shadow
Dimensions (L x W x H)	63 x 55 x 69.5 cm
Cleaning Width	50 cm
Run Time	3-9 hours
Charge Time	<3 hours
Productivity	700-1000 m ² /h
Clean/dirty water tank	15 litres
Weight	75 kg
Noise level	<70 dB
Cruise speed	0.2 - 1.2 m/s
