

Carbon Reduction Plan

Industrial Cleaning Equipment LTD is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Additional Details relating to the Baseline Emissions calculations.			
In 2023 and 2024 we partnered with Planet Mark to report on our Scope 1, 2 and 3 emissions.			
Baseline year emissions: 2023		Recorded emissions: 2024	
EMISSIONS	TOTAL (tCO2e)	EMISSIONS	TOTAL (tCO2e)
Scope 1	700.5	Scope 1	789.7
Scope 2	49.8	Scope 2	27.3
Scope 3 (Included Sources)	131.6	Scope 3 (Included Sources)	120.6
Total Emissions	881.9	Total Emissions	937.7

Statistics Overview and Understanding the Data

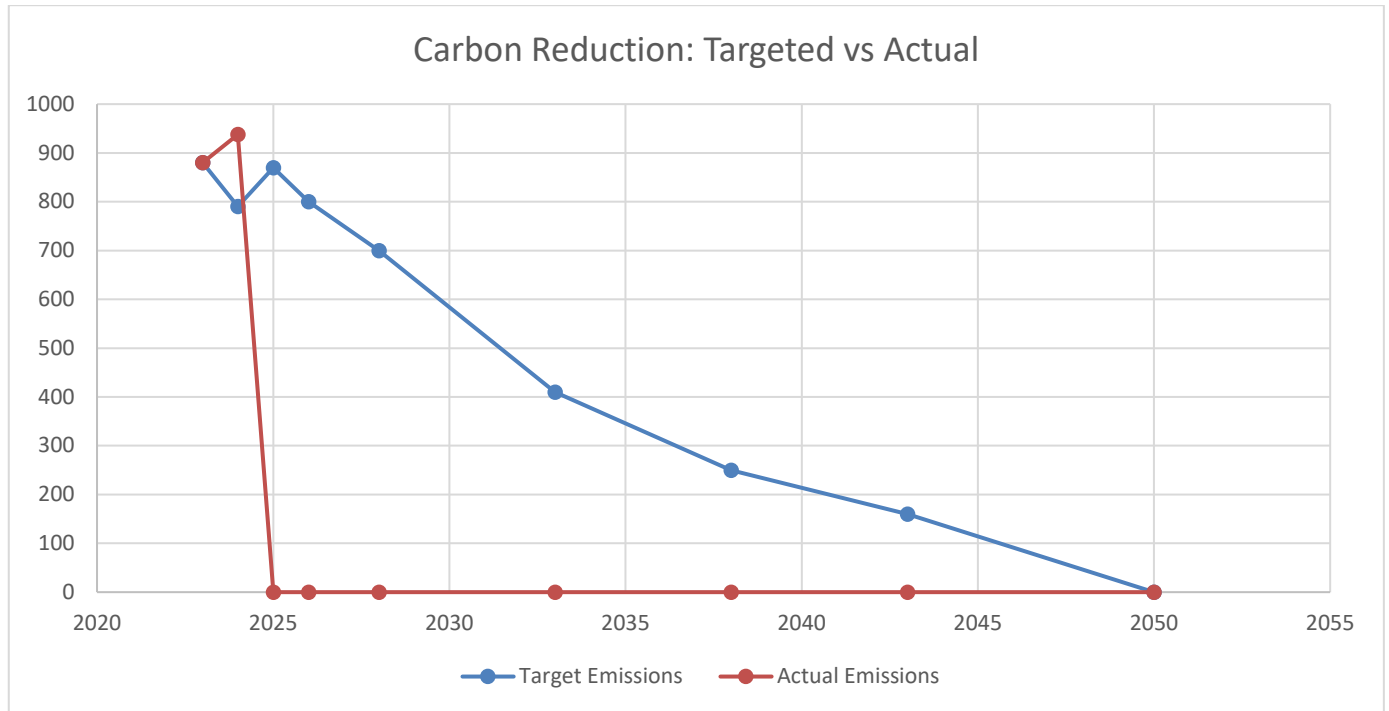

- Our data quality score is rated very well 17/20 (scope 1 & 2) and 16/20 (scope 3)
 - Reporting requirements increased meaning more is reported within scope categories. These increase from 16 in 2023 to 20 in 2024
- ICE has a slightly lower head count from 23-24 and more reporting factors means our tCO2e Per employee increased
- Statistics are derived from government tariffs that change annually
- Number of percentage changes in measurements from 2023 against 2024
 - 22 changes
 - 13 decreases
 - 9 increased (6 of these travel)

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We target a decrease reduction of 5-10% year on year until we are at a point where total emissions are unavoidable to service the business without it becoming an operational detriment.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

For 2025 data, we are swapping to a new carbon reporting partner Neutral Carbon Zone, to gain a more tailored and realistic reduction plan to actively reduce emissions. Once we have our results ICE will use credible carbon offsetting techniques, which will make ICE carbon Neutral.

- Continue conversion of our Fleet to Electric or greener vehicles
- Supplied equipment with water recycling technology and lithium-ion batteries
- Encourage suppliers to provide products that are made from recycled materials or that are net zero for our clients to improve life cycle assessments
- Maintain and strive for continuous improvements for our ISO14001 and Ecovadis accreditations

In the future we hope to implement further measures such as

- Continue conversion of our Fleet to Electric or greener vehicles
- Packaging usage with suppliers
- Reduce packaging through monitoring Extended Producer Responsibility and procuring sustainable packaging
- Participation in local environmental initiatives or community clean-up events annually

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of Industrial Cleaning Equipment LTD:

Mark Bresnihan
CEO

A handwritten signature in black ink, appearing to read 'Mark Bresnihan', is written over a light blue horizontal line.
